in august 2007 the world reacted with consternation as russia planted a flag beneath

the ice of the north pole symbolizing the kremlin s claim to the arctic with its vast mineral resources and firing the starting gun on the world s last colonial scramble the scramble for the arctic which includes color and black and white photographs examines the history of the region and its exploration the current state of ownership the likely outcomes of today s power plays and what is at stake both politically and ecologically with the map literally being redrawn by global warming the ownership of the arctic will be one of the defining issues of the next decade amid much propaganda and obfuscation this informed and clear sighted account of the competing interests of nations corporations and indeed species will prove an invaluable resource

governing arctic seas introduces the concept of ecopolitical regions using in depth analyses of the bering strait and barents sea regions to demonstrate how integrating the natural sciences social sciences and indigenous knowledge can reveal patterns trends and processes as the basis for informed decisionmaking this book draws on international interdisciplinary and inclusive holistic perspectives to analyze governance mechanisms built infrastructure and their coupling to achieve sustainability in biophysical regions subject to shared authority governing arctic seas is the first volume in a series of books on informed decisionmaking for sustainability that apply train and refine science diplomacy to address transboundary issues at scales ranging from local to global for nations and peoples as well as those dealing with global concerns this holistic process operates across a continuum of urgencies from security time scales mitigating risks of political economic and cultural instabilities that are immediate to sustainability time scales balancing economic prosperity environmental protection and societal well being across generations informed decisionmaking is the apex goal starting with questions that generate data as stages of research integrating decisionmaking institutions to employ evidence to reveal options without advocacy that contribute to informed decisions the first volumes in the series focus on the arctic revealing legal economic environmental and societal lessons with accelerating knowledge co production to achieve progress with sustainability in this globally relevant region that is undergoing an environmental state change in the sea and on land across all volumes there is triangulation to integrate research education and leadership as well as science technology and innovation to elaborate the theory methods and skills of informed decisionmaking to build common interests for the benefit of all on earth

this volume explores the governance of the transforming arctic from an international perspective leading and emerging scholars in arctic research investigate the international causes and consequences of contemporary arctic developments and

assess how both state and non state actors respond to crucial problems for the global community long treated as a remote and isolated region climate change and economic prospects have put the arctic at the forefront of political agendas from the local to the global level and this book tackles the variety of involved actors institutional politics relevant policy issues as well as political imaginaries related to a globalizing arctic it covers new institutional forms of various stakeholder engagement on multiple levels governance strategies to combat climate change that affect the arctic region sooner and more strongly than other regions the pros and cons of arctic resource development for the region and beyond and local and trans boundary pollution concerns given the growing relevance of the arctic to international environmental energy and security politics the volume helps to explain how the region is governed in times of global nexuses multi level politics and multi stakeholderism

bringing together interconnected discussions to make explicit the complexity of the arctic region this book offers a legal discussion of the ongoing territorial disputes and challenges in order to frame their impact into the viability of different governance strategies that are available at the national regional and international level one of the intrinsic features of the region is the difficulty in the determination of boundaries responsibilities and interests against this background sovereignty issues are intertwined with environmental and geopolitical issues that ultimately affect global strategic balances and international trade and at the same time influence national approaches to basic rights and organizational schemes regarding the protection of indigenous peoples and inhabitants of the region this perspective lays the ground for further discussion revolving around the main clusters of governance focusing on the arctic council and the european union with the particular roles and interest of arctic and non arctic states and the impact on indigenous populations environment including the relevance of national regulatory schemes and the intertwinement with concerns related to energy or migration strategy concentrating in geopolitical realities and challenges analysed from different perspectives and focusing on different actors and covering security and climate change related challenges this collection provides an avenue for parallel and converging research of complex realities from different disciplines through the expertise of scholars from different latitudes

the arctic has become a global arena this development can only be comprehensively understood from a transdisciplinary perspective encompassing ecological cultural societal economic industrial geopolitical and security considerations this book offers thorough explanations of arctic developments and challenges global warming is in large part the driving force behind the transformation of the arctic by making access

possible to the areas previously out of reach for mining and shipping an all year ice free arctic ocean a reality possible as soon as perhaps 2030 creates a new dynamic in the north the retreating ice edge enables the exploitation of previously inaccessible resources such as hydrocarbon deposits and rare metals as well as the shortest sea route from asia to europe consequently the northern sea route nsr promises faster and cheaper shipping russia along side foreign investment especially from china is financing the needed infrastructure a warming arctic however also has negative impacts the arctic is home to fragile ecosystems that are already showing signs of deteriorating the arctic has seen unprecedented wildfires which together with the release of trapped methane from the disappearing permafrost will in turn accelerate global warming a warmer arctic ocean will also negatively impact fisheries couple this with other global changes such as ocean acidification and modified ocean currents and the global outlook is bleak additionally the security situation in the arctic is worsening after the 2014 ukraine crisis the west imposed sanctions on the russian federation which have revived the divisions of the cold war the reemergence of these postures is threatening the highly successful barents cooperation and other initiatives for peace in the circumpolar north this book offers new insights and presents arguments for how to mitigate the challenges the arctic is facing today

this book approaches the arctic from a postcolonial perspective taking into account both its historical status as a colonised region and new economically driven forms of colonialism one catchphrase currently being used to describe these new colonialisms is the scramble for the arctic this cross disciplinary study featuring contributions from an international team of experts in the field offers a set of broadly postcolonial perspectives on the european arctic which is taken here as ranging from greenland and iceland in the north atlantic to the upper regions of norway and sweden in the european high north while the contributors acknowledge the renewed scramble for resources that characterises the region it also argues the need to unscramble the arctic wresting it away from its persistent status as a fixed object of western control and knowledge instead the book encourages a reassertion of micro histories of arctic space and territory that complicate western grand narratives of technological progress politico economic development and ecological state change it will be of interest to scholars of arctic studies across all disciplines

with discourses of crisis and disaster featuring strongly in contemporary discourses on contemporary society this book brings together critical perspectives from across the humanities and social sciences to explore the idea of crisis as inherently related to power dynamics and the formation of different subjectivities and identities within the nordic countries and globally this volume emphasizes the importance of investigating

the interrelationship of three crises social economic and environmental as these address the interlinked surfaces of the same reality and it examines the negative connotations of the notion of crisis whilst also raising the question of when and why something becomes identified as crisis and for whom with chapters on media representations of crisis and the global context of crisis discourses the crisis of national identities and their mobilization in response and environmental crisis as well as the interrelationship between the social and the environmental and the different positioning of individuals in relation to power this volume offers an understanding of crisis as a multivocal symbol of the present as such it will appeal to scholars of sociology anthropology history cultural studies literature and political science

this book explores and maps the relationship between borders security and global governance theoretically the book seeks to establish to what degree and in what ways traditional notions of borders security and global governance are being eroded undermined and contested in the context of a globalising world borders are increasingly being re conceptualised to account for connectivity as well as divisions at the same time as focus is shifting from permanence to permeability the ambivalence ascribed to bordering processes is at heart a security concern borders are not only entwined with state formation but are also attempts at governing securities identities and histories proceeding from a critical rendering of statist conceptualisations of borders security and governance the book not only emphasises the politics of borders mobility and re locations but also provides a shared groundwork for interrogating the spatial conditions for bordering and border work as manifestations of a continuously deferred becoming rather than being a principal contribution of the volume is its scrutiny of how borders are enacted and perceived in and through the everyday and of how such production and construal can make sense as acts of resistance to various forms of governing such a focus reveals the necessity of investigating how governing from afar affects the possibilities and tendencies to securitise as well as desecuritise within as well as beyond elite settings this book will be of much interest to students of border studies human geography governmentality global governance and ir critical security studies

the routledge handbook of the polar regions is an authoritative guide to the arctic and the antarctic through an exploration of key areas of research in the physical and natural sciences and the social sciences and humanities it presents 38 new and original contributions from leading figures and voices in polar research policy and practice as well as work from emerging scholars this handbook aims to approach and understand the polar regions as places that are at the forefront of global conversations about some of the most pressing contemporary issues and research

questions of our age the volume provides a discussion of the similarities and differences between the two regions to help deepen understanding and knowledge major themes and issues are integrated in the comprehensive introduction chapter by the editors who are top researchers in their respective fields the contributions show how polar researchers engage with contemporary debates and use interdisciplinary and multidisciplinary approaches to address new developments as well as map out exciting trajectories for future work in the arctic and the antarctic the handbook provides an easy access to key items of scholarly literature and material otherwise inaccessible or scattered throughout a variety of specialist journals and books a unique one stop research resource for researchers and policymakers with an interest in the arctic and antarctic it is also a comprehensive reference work for graduate and advanced undergraduate students

exploring the frozen past to rethink our warming future do we really know what cold is in arcticologies lowell duckert delves into early modern european texts to trace how representations of frigidity from the sixteenth and seventeenth centuries have contributed to historical understandings of climate and contemporary debates on climate change arguing that human culture and science are in fact indebted to the cold duckert suggests that these early depictions offer critical terms for advancing the aims of climate change activism and assisting in counterapocalyptic thinking an imaginative and intellectual journey arcticologies reveals the enduring role of cold in wide ranging storytelling traditions it draws on shakespeare s hamlet and othello and the works of thomas dekker rené descartes and thomas hobbes and is informed throughout by contemporary indigenous writing including that of sheila watt cloutier and leanne betasamosake simpson in reflecting on these assorted accounts duckert sees cold as not only an environmental hardship but a source of cultural creativity and resilience highlighting moments of collaboration between humans and the icy world from arctic exploration to urban fairs on frozen rivers cold duckert makes clear is more than the absence of warmth situating our contemporary obsession with impending planetary meltdown within the mazelike arcticologies of the past duckert shows how early modern cold brought about forms of curiosity vocabulary and interspecies relationality that can serve us today in doing so he asks us to identify what has been lost and who is at risk in today s thinning cold while also urging us to imagine alternative futures focused not on inevitable and total collapse but on adaptation and preserving what remains

the topic northern sea route has become a highly relevant point on the strategic radar screen of many business and military leaders since global climate change now opens up a hitherto impassable sea route and positions it as a strategic alternative to

the suez route add to this the discovery of many easily extractable commodities and metals in the arctic area for entrepreneurs this setting offers new opportunities and risks for academics a new research context emerges the book discusses the strategic economic logistic judicial and military challenges of the future great game in the arctic sea

the environmental histories of the arctic and antarctica are characterised by contrast and contradiction these are places that have witnessed some of the worst environmental degradation in recent history but they are also the locations of some of the most farsighted measures of environmental protection they are places where people have sought to conquer nature through exploration and economic development but in many ways they remain wild and untamed they are the coldest places on earth yet have come to occupy an important role in the science and politics of global warming despite being located at opposite ends of the planet and being significantly different in many ways adrian howkins argues that the environmental histories of the arctic and antarctica share much in common and have often been closely connected this book also argues that the polar regions are strongly linked to the rest of the world both through physical processes and through intellectual and political themes as places of inherent contradiction the polar regions have much to contribute to the way we think about environmental history and the environment more generally

the polar regions the arctic and antarctic have enjoyed widespread public attention in recent years as issues of conservation sustainability resource speculation and geopolitical manoeuvring have all garnered considerable international media inter

this book explores greenpeace s efforts to expand its engagement in the circumpolar north in the 21st century and how this work is affected and informed by the organization s controversial legacy of anti sealing campaigning in the 1970s and 1980s presenting the fallout for peoples and cultures targeted by greenpeace s anti sealing campaigning as a pivotal dimension to the organization s history the book argues that this history must first be acknowledged in order to understand how greenpeace has developed more positive working relationships in some instances with northern indigenous peoples in recent years the book looks to dispel the misconception that greenpeace is universally rejected in the circumpolar north whilst also highlighting that its engagement and alliances are being built in the shadow of its yet to be fully tackled history as a leading part of the anti sealing movement greenpeace in the circumpolar north is ideal for courses and research with a focus on arctic studies environmental activism and indigenous studies and for those interested

in learning more about the complex legacy of greenpeace
